PROJECTS

- **REST-APIs-of-Spring-Boot | Java, Spring Boot, REST APIs** (GitHub) Developed modular REST APIs using layered architecture to support scalable CRUD operations. Implemented unit and integration testing with a clean `src/main` / `src/test` project structure. Integrated Spring Data JPA for database operations and optimized API data access.
- **BPL-Fantasy-Squad-Builder | React, TypeScript, Tailwind CSS** (GitHub) Developed a responsive fantasy league squad builder using React and TypeScript with an interactive user interface. Implemented real-time coin management and dynamic player selection logic to enforce squad-building constraints. Utilized React Hooks and interactive UI alerts for efficient state management and user feedback.
- **Dev-Stack-Builder | React, JavaScript, Tailwind CSS** (GitHub) Developed a responsive React application for exploring technologies, viewing details, and building personalized technology stacks. Implemented dynamic technology selection and stack-building functionality with interactive state management. Designed a responsive and user-friendly interface using Tailwind CSS for seamless browsing across screen sizes.
- **DevConf2026 | HTML5, CSS3, Figma** (GitHub) Developed a modern and responsive landing page for DevConf 2026 based on a Figma design mockup. Translated the visual design into a structured web interface using semantic HTML5 and CSS3. Implemented responsive layouts and clean styling to provide a consistent user experience across devices.
